

⚠ Safety Guidance & Warnings (Read Thoroughly Before Use)

Improper use of this device may result in malfunction, injury, fire, or electrical hazard. Failure to follow all warnings voids any manufacturer responsibility or warranty.

General Information

This document contains important information. Read and follow the instructions. Keep the document for future reference. If you pass the product on to others, please include this document. Contents are subject to change. Please refer to the latest version of the documentation, which is available for download at www.impulse9.pro

Intended use

This device is used to process audio signals. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damage resulting from improper use. This product may be used only by persons with sufficient physical, sensory, and intellectual abilities and with the relevant knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

General Electrical Safety

- **ALWAYS disconnect the device from power supply before cleaning, moving, or making any cable changes.**
- Only operate with a grounded, properly rated, linear 9VDC power supply.
- DO NOT use any power supply showing visible signs of damage (fraying, exposed wires, broken housing, overheating).
- DO NOT use a switching power supply—this may cause unstable operation, dropouts, or permanent damage.
- Verify voltage, current and polarity before connecting. Incorrect voltage, current or polarity may cause device failure, electrical shock, or fire.
- Do NOT use with extension cords or adapters that do not have proper ground contact.
- NEVER attempt to open, modify, or repair the device yourself. **No user-serviceable parts inside.**
- If device emits smoke, unusual odor, or strange noises, disconnect power supply immediately and seek qualified service.

Environmental & Usage Safety

- Device is for **indoor use only**. Do not expose to rain, moisture, or liquid spills. Exposure to moisture can cause electric shock or malfunction.
- Do not operate in environments with excessive dust, direct sunlight, heat sources, or extreme cold.
- Do not block device ventilation; overheating may result in device damage or fire.
- Do not stack other equipment on top of this device.
- Keep away from flammable materials, liquids, and vapors.
- Device is not certified for use in life support, medical, or hazardous environments.

Connection & Setup

- **ALWAYS ensure all equipment, including amplifiers and other connected devices, is powered OFF and UNPLUGGED before connecting or disconnecting cables.**
- Always make sure the power supply is plugged into a grounded outlet **before** connecting to the device.
- Only use stable, high quality, low noise linear power supply with the device.
- Do not use device with incompatible input/output signal levels or impedances.
- Only use quality cables and connectors. Damaged or inferior cables may result in electric shock, noise, or device malfunction.
- Avoid excessive force on input/output jacks, as well as the controllers to prevent mechanical damage.

Personal Safety

- **Always follow the USER MANUAL** while using the device.
- **Keep out of reach of children and pets.** Small parts may pose choking hazard.
- This device can produce high sound pressure levels. Protect your hearing: avoid prolonged exposure to high volumes.
- Do not touch connectors, plugs, or the device with wet hands.
- In case of malfunction or damage, **do not continue operation.**
- Unplug device during thunderstorms or when not in use for extended periods.

Maintenance & Cleaning

- Only clean device with a dry, soft cloth. Never use solvents, water, or aerosol cleaners.
- Ensure device is fully disconnected from power and other equipment before cleaning.
- Inspect the power supply and cables regularly for wear or damage.

Disposal & Environmental

- Do not dispose of device in regular household waste. Use appropriate electronic waste collection points (WEEE).
- Remove all cables and accessories before disposal.

Compliance & Modifications

- Use of non-approved accessories or modifications will void CE compliance and warranty, and may make device unsafe to operate.
- Device is not certified for use in safety-critical, industrial, or medical applications.

Extreme Scenario Warnings

- Failure to properly ground the device or use an improper power supply could result in serious electrical shock, device destruction, or fire.
- Operation outside recommended voltage/current can cause unpredictable behavior including sudden output surges, dropouts, or permanent circuit failure.
- Physical impact, excessive vibration, or dropping the device may result in internal damage and potential safety hazards.
- In the event of any liquid ingress, **immediately disconnect power and do not use until inspected by qualified personnel.**

THE MANUFACTURER IS NOT LIABLE FOR ANY DAMAGES RESULTING FROM IMPROPER USE OF THE PRODUCT.

By operating this device, you acknowledge you have read and understood all safety instructions and warnings provided. If in doubt, always contact the manufacturer before use.

⚠ Safety Guidance & Warnings (Read Thoroughly Before Use)

Improper use of this device may result in malfunction, injury, fire, or electrical hazard. Failure to follow all warnings voids any manufacturer responsibility or warranty.
